New mission

**Half a house**  
Ballymurn  
19-03-2017 - 31-03-2017

18 / 10 user events so far

**The Triangle**  
Enniscorthy, Co Wexford  
19-03-2017 - 26-03-2017

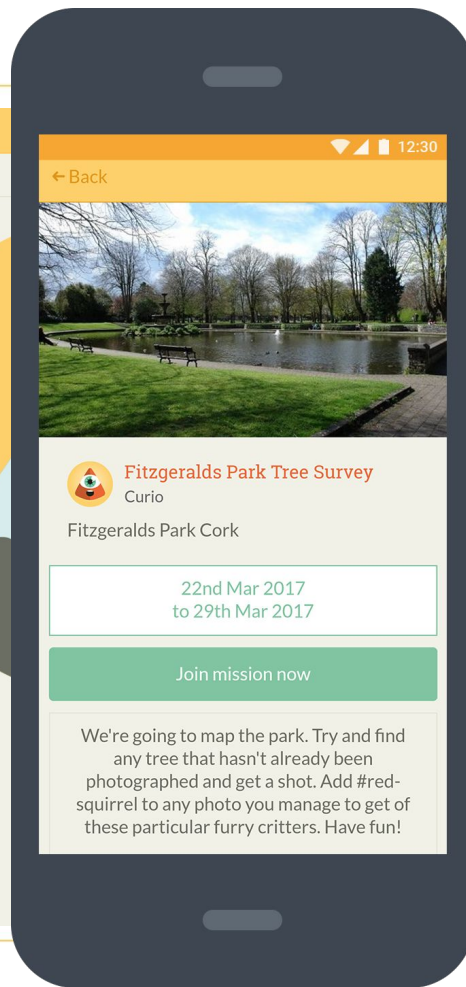

## Missions are go!

From here you can set up and run special missions in your area. This will enable you to better direct the efforts of crowdsourcing contributors to places where you need their assistance the most. It can also be a fun way to engage the public more directly by setting them challenges and short term goals.

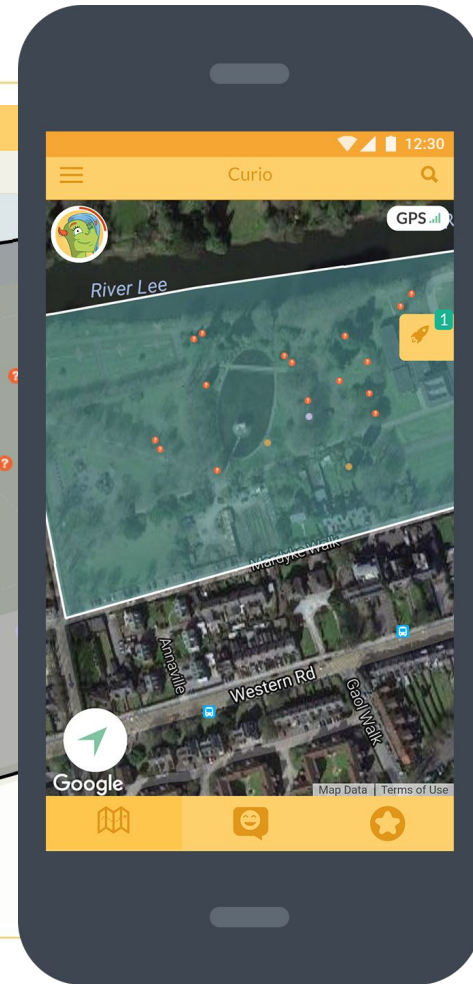

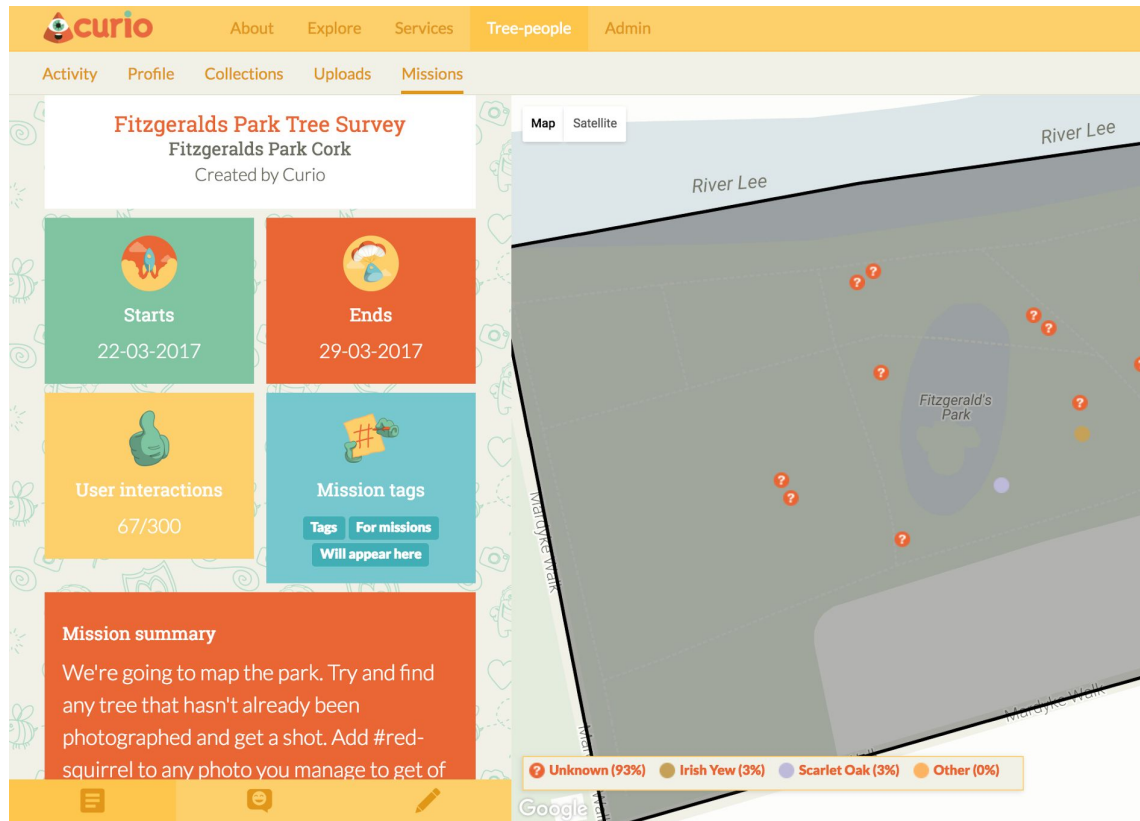

Missions can be used to focus on the collection of data in particular areas or for engaging with more localised communities or even for adding an extra dimension to particular events like a festival in a park.

We recommend that you experiment with the types of targets you set to see how well people engage. We will gather feedback on all the different missions that get run through Curio to provide a knowledge-base on successful techniques and pro-tips to benefit everyone.

The Mountshannon collection was

## Protecting the environment

Curio is here to highlight and support experts and organisations involved in caring for trees and for the environment.

Increase the visibility of your efforts by showcasing them through your very own, professional Curio profile which is linked to the trees and data under your care.

Become part of a visible, global effort of people and organisations, helping each other to sustain the world's trees and forests.
