Call for Papers

Inaugural Conference on the

Principles and Practice of Programming in Java^{TM}

Trinity College, Dublin, Ireland

June 13-14, 2002

General Chair
John Waldron,
Trinity College, Dublin.
`john.waldron@cs.tcd.ie`

Program Chair
James Power,
NUI Maynooth.
`james.power@may.ie`

Topics

- Software Engineering with Java
- Program Design and Implementation
- Design Patterns through Java
- Novel Applications of Java
- Performance of Java Programs
- Practice and experience
- Teaching Java Programming
- Applications in science, engineering and mathematics

Important Dates:

- Paper submission: March 17, 2002
- Notification: April 19, 2002
- Camera-ready copy: May 10, 2002
- Conference: June 13-14, 2002

Despite its relatively recent origin, the Java programming language has become established as the language of choice for internet-based and mobile applications, and increasingly challenges the prominence of more established languages in many other fields.

This conference seeks to draw together researchers, teachers and programmers who study or work with the Java programming language to discuss the principles and practice of its use, in the friendly and convivial environment of Trinity College Dublin.

Theme

We invite papers exploring all aspects of Java programming; in particular we seek research papers covering the principles of programming in Java, and teaching and experience reports dealing with the practice of Java programming.

The list of topics is not intended to be exhaustive; papers related to other aspects of Java programming are welcome.

Submission Information

Please submit a full paper of up to 6 pages in length. Papers should be formatted so that they are single-spaced, single column, and use a 12pt Times font.

Papers in PDF format should be submitted by e-mail to `pppj@cs.tcd.ie`, to arrive not later than March 17, 2002.
